We want to duplicate your success!

Quark/Pagemaker Checklist:

- ☐ Are all imported full color images from Photoshop saved as CMYK TIFF files at 300 dpi (exception: monotones, duotones, tritones, etc. as EPS files); are they supplied with the Quark/ Pagemaker file?
- ☐ Are all Illustrator/Freehand files imported into Quark/Pagemaker saved with the fonts converted to curves outlines; are the images contained in the Illustrator/Freehand file CMYK or spot color (Pantone only)? No RGB files!
- ☐ Are the Illustrator/Freehand files provided with the Quark file?
- ☐ Are all fonts used in the Quark/Pagemaker file postscript 1 font files (printer font and screen font); are they included with the Quark/Pagemaker file?

Illustrator/Freehand Checklist:

- ☐ Is the Illustrator/Freehand file saved as an EPS file with all used fonts converted to curves/outlines?
- ☐ Are all images used in the Illustrator/Freehand file CMYK or spot color (Pantone only)? No RGB files!
- ☐ Are all linked files provided with the Illustrator/Freehand EPS file?

Photoshop Checklist:

- ☐ Are all full color images saved as CMYK TIFF files at 300 dpi and are they supplied with the Original Photoshop file? No RGB files!

Important Note: Text incorporated in Photoshop will print Bitmapped.
